What is the Arbroath and Area Partnership?

The Partnership is a local group who aim to make the Arbroath area a better place to live by getting things done.

How can this be achieved?

By members sharing their ideas and expertise to identify projects which will enhance the community and investigate how they can be funded.

Who is involved?

Any individual or organisation can join the Partnership, and a wide range of organisations are currently represented, including community and voluntary organisations, and statutory agencies. The Partnership has a duty to find out what people think, so every voice counts. Becoming involved in the Partnership gives you an opportunity to influence how your community develops. The work of the Partnership feeds into the overall Community Planning process.

Do young people have a role?

Yes. We would welcome representatives from organisations for young people as we hope to involve young people more in our future activities.

What has been done so far?

No idea is too big or small. With help from various organisations, cliff-top safety signs have been erected recently which we hope will have a significant impact on the area. We are also developing what we have identified as our 'Top 3 Local Priorities'. These include:

- Community Cinema Project
- Promoting Tourism and the Local Economy
- Celebrating the Year of the Light 2011

Ideas for development come from member organisations and local people. We work with organisations that can help identify funding sources, so our ambitions are attainable.
